

Telephone Protection Hood Type 404

**Especially suitable for use
in noisy work environments**

- ▶ Sound absorbt up to 25 dB(A)
- ▶ Weatherproof
- ▶ RAL coatings on request
- ▶ Also in stainless steel available

Application

The telephone protection hood is an excellent aid to cut out extraneous noise and improve audibility in noisy surroundings when open telephones have to be installed for economic reasons.

The special shape of the hood and its inner lining of sound-absorbing material optimally reduces noise in the area of the telephone. Eavesdropping is also made difficult. The best acoustic effect is achieved when the protection hood is mounted with its back facing the noise source or loudest noise source (see directional diagram of sound-level reduction).

Design

The protection hood is made of sheet steel and lined on the inside with sound-absorbing mineral fibre boards behind a perforated plate cover.

Telephoning in areas with noisy surrounding

The best acoustic effect is achieved when the protection hood is mounted with its back facing the noise source.

Technical specifications

Housing	Hot-galvanized sheet steel or stainless steel
Paint	powder coated
Colour	Yellow special coating on request
Dimension	as per drawing
Weight	approx. 35 kg
Sound absorbt	up to 25 dB(A)
